

Our platform androMEDa is groundbreaking cloud-based medical marketplace where healthcare professionals can connect with specialized 3D companies experienced in implementing 3D technologies in the medical field.

connecting medical and 3D professionals

connecting institutions and businesses

connecting experience and innovations

### NEW TEAM FOR NEW SOLUTIONS

- Pavle Ogrizović, Founder, 3D Technologies Expert
- Miloš Babić, Co-founder, Software Engineer
- Branislav Krivokapić, Orthopedic Surgeon
- Nemanja Slavković, Professor of Surgery
- Ivan Karaić, Biomedical Engineer

To find working formula, we gathered a team of experienced engineering and medical professionals that grew relationship through our first successful projects:

**HIGH-SPEED ORTHOSIS MANUFACTURING PROCESS**

Emergency is Speed: Original streamlined process for affordable orthosis parts and assemblies based on 3D Scans, automated parametric 3D modeling and hand-picked additive manufacturing technologies.

**PATIENT-SPECIFIC SURGICAL GUIDES FOR TOTAL KNEE ARTHROPLASTY**

Precision in Practice: Our cutting-edge procedure involves the transformation of X-ray and CT scan images into meticulously crafted 3D models of the knee as well as following tooling for surgical interventions.
